Portfolio

Career Objective

Frontend-focused MERN stack developer with expertise in React, Tailwind CSS, Firebase, and JWT. Skilled in Node.js, Express, and MongoDB to build scalable full-stack applications with strong emphasis on performance and user experience.

Skills

Next.js, React.js, Tailwind CSS, Node.js, Express, MongoDB, Firebase, JWT

Tools & Technologies

Git, GitHub, Vercel, NPM, Netlify, Firebase Deploy

Education

Currently studying in Pabna University of Science and Technology, Department of CSE.

Web Development course from "Programming Hero".

Projects

Wholesale

[Live Project Link](#)

A responsive full-stack B2B wholesale platform with category-based browsing, secure authentication, and a dynamic cart system. Built with React, Node.js, Express & MongoDB. Stack: React, Tailwind CSS, Swiper.js, Node.js, Express, MongoDB

Blood Aid

[Live Project Link](#)

BloodAid is a modern full-stack blood donation platform built using the MERN stack (MongoDB, Express, React, Node.js) and Firebase Authentication. It empowers users to request or donate blood, manage donation statuses, explore verified donors, and handle admin operations with ease. The goal is to make life-saving connections seamless and accessible.
